

We are excited to announce that the long awaited Moanalua Performing Arts Center will finally become a reality! Governor Lingle has recently released the initial 4.7 million dollars needed to design and start construction of the new 17 million dollar facility. This is an exciting development for the Music Program, Moanalua High School and the community as a whole.

The new building complex will be located adjacent to the student parking lot, Student Center and baseball field on the Moanalua High School campus. The preliminary design includes a 1,000 seat auditorium, box office, music library, practice rooms and additional classroom and storage space, which when completed, will be the new home of the Moanalua music department programs.

Thank you for all your support!
